

Simple, small, stable: The new AMF 15 Litre Convenience Pack

AMF packaging innovation

At NZMP, we're always innovating to find the best solutions for our customers. We recognised an increasing demand for AMF packaging that was more convenient and flexible, so we developed the AMF 15 Litre Convenience Pack.

Our latest innovation can be stored ambient, allowing you to have great-tasting AMF for up to 18 months. This means that we can continue to deliver the unmatched quality, consistency and rich dairy flavour of our AMF to a wide range of customers all around the world.

A solution to suit your needs

The 15 Litre Convenience Pack is a perfect solution for customers that are unable to process, manoeuvre and store our bulk AMF packaging options, or for those who simply want to trial our AMF without committing to larger quantities.

A cost-effective alternative for butter customers, it has the added convenience of not having a chilled supply chain. It can also open up the market to those using small format alternative fat sources such as vegetable fats.

Key characteristics

**Ambient**

Ambient storage
up to 18 months*

**Safe**

Tamper evident seal

**Stronger**

Extra strong
carton

Light and oxygen
barrier bag inside

**Lightweight**

13.5kg of AMF

**Convenient**

15 Litres

*when stored at 15 to 20 degrees

This grass-fed dairy ingredient is made from the milk of New Zealand cows who can graze outdoors on the grass of open pastures, as nature intended.

VERSION03.OCTOBER/2017

Key benefits

Simple, stable storage

This ingredient is stored at ambient temperatures, opening up new opportunities and saving costs on chilled storage and transport.

Operational efficiency

Scoop-able straight from the box, helping you save on labour costs and increase manufacturing efficiency.

Maximise space, reduce costs

Made with extra strong cardboard in an easily stackable rectangle shape helps you maximise your distribution centre space and reduces shipping costs.

Clean label

Full of natural goodness, this ingredient contains no additives, preservatives, foreign fats or other impurities.

Assured

Tamper evident seal means you can rely on our high standards of food safety and quality and maintain your excellent reputation.

Easy entry into market

Smaller format is the ideal way to trial NZMP solutions without having to commit to a larger quantity.

Easy to lift and load

Lightweight and convenient shape is easy to handle manually, reducing the need for investment in lift and load apparatuses.

Consistent quality

Part crystallised to retain consistency when melted, chilled or re-chilled, so you can be sure you'll always get high quality results.

True dairy flavour

Made with the milk from grass-fed cows, providing a full, creamy dairy flavour.
